

The Green-Zones App

- ✓ Zoomable GIS maps
- ✓ All regulations of all environmental zones
- ✓ Live data and forecasts on driving bans

Green-Zones is the European information portal which provides information on all environmental zones and driving bans in Europe, and offers the central purchase of national environmental badges/vignettes for freight forwarders, tourist buses and private individuals.

All you need to know
about Diesel Driving
Bans in Germany!

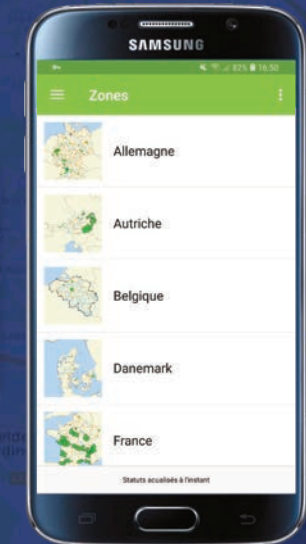

- ✓ Order available in 10 languages
- ✓ Placing orders for vehicle fleets via Excel
- ✓ Upload vehicle documents up to 15 MB
- ✓ Personal contact by phone, fax and e-mail
- ✓ Immediate service by express orders
- ✓ All badges and vignettes from a single source

Two Blue Badges?

The German Federal Environmental Agency is planning to introduce two new badges in order to identify vehicles with low NOx emissions. A badge alone is not enough, because even the newest diesel engines have been manipulated in terms of pollutant levels and exceed the permitted NOx emissions. For this reason, two blue badges could soon be introduced: a light blue one for retrofitted EURO 5 diesel and already approved EURO 6 diesel, a dark blue one for the latest EURO 6 and 6-Temp diesel. However, the dark blue badge is only required in small and heavily polluted areas. This would also facilitate the gradual introduction of driving bans as stipulated by the Court in Stuttgart.

WHERE?

WHO?

WHEN?

The light blue badge for

- Petrol vehicles with EURO 3-6 standards with direct injection but without particulate filter.
- Diesel vehicles, diesel trucks/commercial vehicles with EURO 5 standard and SCR retrofitting (Ad-Blue).
- Diesel vehicles, diesel trucks/commercial vehicles with EURO 6b and 6c standards.

The dark blue badge for

- Petrol vehicles with EURO 3-6 standards without direct injection.
- Petrol vehicles with EURO 6c and 6d-TEMP standards and direct injection.
- Petrol vehicles with EURO 3-6 standards, direct injection and particulate filter.
- Diesel vehicles, diesel trucks/commercial vehicles with EURO 6d-TEMP standard.
- CNG/LPG –vehicles as cars, trucks, buses with EURO 3 to 6d-TEMP standards.
- Electric vehicles without combustion engine.

Attention: Since there are no legal requirements in Germany, which vehicles should receive a Blue Badge, the abovementioned proposals and ideas of the German Association for the Environment (DUH), the Federal Environmental Agency and other institutions are not yet legally binding.
